Rupert Denoon presents the Technological Innovations Group roadshow in Johannesburg

*Technological Innovations Group South Africa roadshow proves to be a huge success*

Technological Innovations Group (TIG) are pleased to announce that their 'Ultimate Meeting Room' roadshow that took place in South Africa over the past few weeks was a huge success. The roadshow took to Johannesburg,

Durban and Capetown throughout May and was attended by over 150 dealers and end-users. The roadshow demonstrated how Crestron's Flex solutions and Mezzanine by Oblong Industries can work seamlessly together, creating the 'Ultimate Meeting Room'.

In an industry first, TIG's Crestron Flex Roadshow featured Crestron corporate solutions together with a virtual demonstration of Oblong Industries' flagship Mezzanine platform. The demonstration illustrated how combining Crestron and Mezzanine technology allows meeting participants to share multiple streams of content, from multiple locations, simultaneously. In this way, innovative and more effective ways of working become possible, because when teams can see more and share more, they can do more.

Speaking to AV Integration during the Johannesburg leg of the event, Crestron regional director Rupert Denoon stated that he and the TIG team are very excited about the growth in demand for smart office technology in South Africa and that Flex Roadshow aims to provide integrators with an opportunity to experience Crestron's Flex range, first-hand.

TIG is the exclusive sales agency for Crestron in EMEA and is a strategic sales partner for Oblong Industries' flagship collaboration platform, Mezzanine. The 'TIG on Tour' roadshow brought solutions from both brands to dealers, consultants and end-users who want to experience the most forward-thinking meeting room innovations.
